

CAREER OBJECTIVE

Aspiring Computer Science Engineering student with a strong interest in Artificial Intelligence, Software Testing, APIs, web development and debugging. Eager to learn new technologies and contribute to innovative projects. Seeking entry-level opportunities to gain hands-on experience and enhance technical skills in real-world.

EDUCATION

T John Institute of Technology	Bengaluru, India
Computer Science & Engineering, CGPA: 9.22 (up to 6 th semester)	Sep 2023 – 2027

SKILLS SUMMARY

- **Languages:** Java, Python, C
- **Web Technologies:** HTML5, CSS, FastAPI
- **Tools & IDEs:** Git, GitHub, VS Code, Eclipse, Excel, Jupyter notebook
- **Databases:** SQL, MySQL, DBMS Fundamentals
- **AI & GenAI:** LangChain, RAG, LangGraph, Prompt Engineering
- **Concepts:** API testing, Linux basics, Cloud Computing
- **Software Testing:** Manual Testing Concepts, Test Case Design, Postman(Basic), JMeter(Basic)
- **Soft Skills:** Problem solving, Time management, Team collaboration, Quick learner

EXPERIENCE

COMEDKARES – Student Project Contributor	Sep 2024 - Nov 2024
• Developed Arduino-based prototypes with sensors and actuators • Implemented basic embedded programming and hardware interfacing	
INNOMATICS RESEARCH LAB – Agentic AI Intern	Feb 2026 – May 2026
• Worked on Agentic AI applications using LangChain, RAG and LangGraph • Built RAG Based Customer Support Bot Focused on intelligent agents and retrieval systems.	

PROJECTS

Lost and Found Web Portal – Reunite System Repository	Nov 2025
• Developed a full-stack web application for reporting and tracking lost-found items. • Implemented login, item reporting, real-time chat functionality, claim verification, and admin dashboard. • Used HTML, CSS, JavaScript for frontend, Python for backend logic and MongoDB for data storage.	
Hospital Appointment Management System Repository	Jan 2026
• Build a console-based, menu-driven hospital appointment system. • Enabled patients to book appointments and administrators to view, search, and cancel records. -Integrated MySQL database via JDBC for persistent data storage.	
Library Management System (FastAPI) Repository	Mar 2026
• Developed REST APIs for adding, searching, issuing, & returning books • Used Pydantic for data validation, performed API testing (Postman) and API routing using Swagger UI.	
RAG-Based Customer Support Bot Repository	May 2026
• Developed an AI-powered customer support system using RAG. • Integrated backend APIs for query handling and response generation.	
Agentic AI-Ops Assistant for Kubernetes Clustering Repository	
• Developed an AI-powered Kubernetes monitoring and failure detection system. • Implemented log-based root cause analysis and real-time dashboard visualization.	

CERTIFICATES

- | | |
|---|-------------|
| • Microsoft Azure AI Fundamentals (AI-900) – IN-BIOT Private Limited | 2024 |
| • Microsoft Azure Fundamentals (AZ-900) – IN-BIOT Private Limited | 2024 |
| • Networking Basis -Cisco Networking Academy | 2025 |
| • Smart India Internal Hackathon – Certificate of Participation | 2025 |
| • Cloud Computing and Distributed Systems – NPTEL | 2026 |

- **Machine Learning – CodeChef** **2026**
 - **Full Stack Development – CodeChef** **2026**
-

COMPETITIONS

- Participated in **South Regional State-Level India Skills Development Competition (Software Testing Domain) at Hyderabad** **Feb 2026**
 - Secured 4th place in Hack2Hire 1.0 (Nile Secure) hackathon by building Agentic AI for Kubernetes.
-

PUBLICATIONS

Published research paper title “**Cognitive Burnout Early Warning System Using Explainable AI and Conversational Assistant**” in **IJSRED** Journal. **2026**
